FALL 2021
International Honors Program
IHP Health and Community
Track 2

Globalization and Health
IPBH 3500 / 4 credits

PLEASE NOTE: This syllabus is representative of the anticipated Fall 2021 program. Because courses develop and change over time to take advantage of unique learning opportunities, actual course content varies from semester to semester. In addition, considerations of student/public safety may change some course content. With global public health responses rapidly unfolding, some readings and content will necessarily be added/adapted closer to the start of the semester.

Course Description
In this course, students will learn about public health with a pre-departure review of basic concepts in globalization, and comparative field experiences in VietNam and South Africa. Globalization is a contested term that means different things to different people, depending on their disciplines, ideologies, and the effects of globalization processes on their daily lives. Despite the common impression that globalization is a product of Euro-American ‘modernity’, many argue that global interconnectedness and transnational flows have long been fostered by international trade, conquest, colonialism, development, migration, exploration and other forms of travel. Similarly, while the term ‘globalization’ (sometimes mistaken as a synonym for ‘westernization’) is often understood exclusively in terms of European and North American forces, many scholars point to the ability of individuals and groups outside this geopolitical context to shape our increasingly interconnected world.

The globalization and health course will be organized around key overarching themes, featuring relevant topics in each country context. By learning with local globalization and health experts in each program location, the class will explore critical questions, threaded across the arc of the semester. The course will offer a critical analysis of globalization as a set of complex political, economic, cultural and ecological processes, focusing on how these processes intersect with issues of health and wellbeing. Local faculty in each program location will build on the foundational framework offered in the pre-departure reading assignment, Globalization: A Very Short Introduction by Manfred Steger, through active engagement with that text and additional locally relevant texts and lectures. Together, we will critically evaluate the role of institutions, corporations, and governments as part of the workings of globalization that exacerbate/ameliorate health inequities. We will debate the role of colonialism, the nation-state, and ethnocentrism in defining the type of healthcare available in different societies and people’s access to resources. Learning will be multi-faceted, ranging from the theoretical to the lived local experience. You will experience active engagement with local faculty in each location, critical observation, discussions with community organizations and leaders, field visits, lectures from local experts, collaborative learning, group discussions, and critical reflection.
**Learning Outcomes**
The *Globalization and Health* course comprises 60 class hours of instruction and field experience (4 credits). Upon completion of the course, students will be able to:

- Contrast theories of the contested concepts of globalization and articulate clear examples of how the global intersects with and impacts the local.
- Assess the relationships between structural health disparities and globalizing, ‘modernizing’, and nation-building processes.
- Evaluate the interrelationships between governance, neoliberalism, development, and healthcare practices.
- Differentiate among key organizations and institutions, their roles in globalization, and the manner in which they can cooperate to address key issues.
- Illustrate the linkages between local, national, international and transnational processes with respect to key transitions in political economy (colonialism, post-colonialism, nation-building, neoliberalism, etc.)
- Synthesize observations from multiple countries to reflect on the interplay of global and local in healthcare policy and practices, as well as local experiences of globalization.
- And, understand how all of these powers work together to help or hinder health equity.

**Materials**
Required Readings (Students must purchase this book; approximate cost = $7.00-12.00 USD):

This book is not a textbook for the course but will be referred to and drawn upon at various points during the semester. In this clear and succinct introduction to globalization, Steger argues that while globalization can be studied from many different perspectives (e.g. cultural, economic, political, ecological), in practice these different dimensions are interconnected and mutually constituting. Through different lectures, faculty and country programs may emphasize different aspects of globalization. A significant aim of this course is that students will come away with a solid grasp of the interconnectedness of various dimensions of globalizing processes.

All other required course readings will be electronically available at the start of the semester. Hard copy required course readings will be distributed as you arrive to each location, except in the case of the first class where the assigned reading is the book noted above and information was sent to you as part of your pre-departure assignments. You may opt in or out of getting hard copies as you travel. Students are responsible for downloading reading materials and can print optional readings at their own discretion.

**Methodology**
This course is organized into one pre-departure module, two field-based modules, and a final comparative assignment module. You will have local faculty in each program location who will teach the classes for module delivered in that site. Your local faculty will give and grade the assignments for their module. All local faculty have collaborated and normed assignment expectations, rubrics, and grading. The collection of your GH assignments will become your “GH Portfolio” and will be the basis for the final Critical Comparative Portfolio Analysis assignment given and graded by the Program Director.

There will be two types of assignments for this class: (1) two recurring assignments, each of approximately 1,000 words, recurring in each module, generally submitted by the 2nd and 4th weeks of your time in each location, (2) one larger assignment of approximately 1,250+ words, specific to each location, that will take the form of a paper, project, or activity + analysis and will be submitted toward the end of your time in each location.

**NB:** All work for this course will be handed in electronically via Canvas. This collective work will become the GH Portfolio for the final Comparative Module assignment.

**Assignments**
Assignments (except for hard copy assignments) should be submitted via the course’s Canvas site. Assignments are due the day assigned, uploaded to Canvas. Grades will be returned via Canvas as well.

Students may never use email to submit assignments, per SIT IT Policy.
PLEASE SUBMIT ALL ASSIGNMENTS AS A MICROSOFT WORD FILE to allow for in-document comments.

All assignments are to be double spaced with one-inch margins in 11 Times New Roman font. The American Psychological Association (APA) referencing and citation style is preferred.

When using APA format, follow the author-date method of in-text citation. This means that the author’s last name and the year of publication for the source should appear in the text, for example, (Jones, 1998), and a complete reference should appear in the reference list at the end of the paper. If you are referring to an idea from another work but not directly quoting the material, or making reference to an entire book, article or other work, you only have to make reference to the author and year of publication and not the page number in your in-text reference. All sources that are cited in the text must appear in the reference list at the end of the paper.

Please include your name on every page of the assignment itself in the header, and the file name should have the following naming convention:

   Name_Country_NameOfAssignment.doc  e.g. Josslyn_South Africa_MappingHealthcareSystem.doc

For hard copy assignments, you may be asked to submit the original. KEEP A DIGITAL COPY OF ALL WORK YOU TURN IN ON YOUR COMPUTER, so as to avoid unexpected disaster and significant inconvenience for all parties involved; this may mean scanning or photographing any hard copy assignments (and keeping a copy in .jpg or .pdf). Assignments that are not easily legible will be returned ungraded.

See end of syllabus for late work and make-up assignments policies.

### Evaluation and Grading Criteria

Assignments

Global/local Artifact: USA

*The Global/local Artifact assignment will repeat in each program location. Continue to refer back to this section for directions and the grading rubric. Be as detailed as you can in each context. At the program start, we will review this assignment and practice it together.*

In light of concepts and theories from lectures and readings, you will collect and analyze an artifact (a piece of evidence) in the launch city that illustrates a local experience of global processes. This recurring set of portfolio entries will facilitate tracking transnational flows and discontinuities and thus illustrate the linkages between local, national, and transnational healthcare processes as we travel from place to place.

The analysis should be clearly health related. It will also encourage critical evaluation of globalization, health disparities, and local healthcare experiences/practices, starting with the USA. Your ability to analyze should become stronger over the course of the semester.

** You must do more than track a physical object as it, or its components, move globally—you need to press your analysis beyond this to show how the artifact you have chosen exemplifies or can represent the political, economic, cultural, technological, or ideological processes that make its meaning, use, and deployment matter within the local context. You must make clear connections to Health and Community topics and concerns. Consider: how does that artifact produce people, as much as people produce it?
Your analysis should be about 1,000 words and should include these three points:

1. **Description of an artifact that demonstrates a local experience of a global process**
   - Your artifact may be an experience (e.g. participating in group activity), a practice (e.g. observing a religious service), or a physical material (e.g. a food).
   - You may present the artifact as a piece of physical evidence such as a train ticket, a photograph, or artistic rendering, or you may describe it in a few sentences. All artifact descriptions must include information about when and where you encountered the artifact.
   - How does this artifact relate to another program component (reading, site visit, guest/faculty lecture, etc.) pertaining to local experiences or processes?

2. **A brief but thoughtful analysis of how the artifact represents and/or is an actual example of global/transnational processes**
   - Describe why you consider this artifact to be global/transnational and (using your Steger book) explain which domain/s it flows within or among.
   - For example, you might consider one or more of the following questions: Where does it flow to and from? How does it move? What people are involved in its movement? What barriers, or regulatory mechanisms, might influence the rate or direction of its flow? How does this artifact contribute to the production of localities, personhoods, the norming of western culture, etc.?

3. **A brief but thoughtful analysis of how the artifact is local/localized**
   - Describe why you consider the artifact to be ‘local’ and how it fits within the local physical or social landscape. In what ways does its presence there make a difference to the lives of the people in that locality?
   - For example, you might consider one or more of the following questions: How is the artifact expressed differently here than in its place of ‘origin’? How does it change to accommodate distinctively local conditions, materials, values, or processes? What people are involved in localizing it? How does it take on local characteristics or ‘flavor’?

The faculty and staff will assist you should you have questions about this assignment as you progress through the semester. It should be evident that your understanding of globalization and health develops and becomes more sophisticated over the course of the semester. These assignments, along with your module assignments listed in the rest of the syllabus, will become part of your overall portfolio of GH assignments that you will use for your Module 4 assignment at the end of the semester.
Grading Rubric
The assignment will be graded as achieving one these grades consisting of an A, A-, B, or no credit. This is a simplified grading system, designed to assure that you do a minimum of B level work on these fundamental assignments. Consider this as a version of a “credit/no credit” assignment, in which there is a graduated expression of how well the “credit” has been achieved.

<table>
<thead>
<tr>
<th>0 Points- No credit</th>
<th>8.5</th>
<th>9.0</th>
<th>9.5 or 10 points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Does not make a meaningful attempt at addressing the assignment;</td>
<td>A reasonable description however has factual errors;</td>
<td>A reasonably thorough description with few significant factual errors;</td>
<td>A clear and thorough description with few significant factual errors;</td>
</tr>
<tr>
<td>Has multiple inaccuracies and/or needs supporting details;</td>
<td>Needs more accurate and necessary details;</td>
<td>Provides some accurate and necessary details;</td>
<td>Provides accurate and necessary details;</td>
</tr>
<tr>
<td>Supporting ideas and context are provided superficially but not accurate or are not ‘unpacked’ or examined;</td>
<td>Ideas/examples are not well ‘unpacked’ or contextualized;</td>
<td>Ideas/examples could be more ‘unpacked’ and properly contextualized;</td>
<td>Ideas/examples are ‘unpacked’ and well contextualized;</td>
</tr>
<tr>
<td>Limited or no connections to case studies are made;</td>
<td>Connections to the case study topic need to be made more clearly (questions will still remain about this, but those questions can be identified in the paper);</td>
<td>Connections to the case study topic are clearly made but not as well thought out (questions will still remain about this, but those questions can be identified in the paper);</td>
<td>Connections to the case study topic are clearly and thoughtfully made (questions will still remain about this, but those questions can be identified in the paper);</td>
</tr>
<tr>
<td>Paper is not poorly written or falls far short of the word requirement.</td>
<td>Paper is acceptably written but not done well or does not meet the word requirement.</td>
<td>Paper is well-written and meets the word requirement.</td>
<td>Paper is well-written and meets the word requirement.</td>
</tr>
</tbody>
</table>

In addition to the above, a 10-point paper is excellent, has a little something extra that sets it apart, and shows effort beyond the basic requirements.
## Module 2: VietNam

### Lectures and Readings

</thead>
</table>
| GH 5    | Globalization, Cultural Values, and Healthcare | Ideologies of globalization and healthcare values in a post-COVID-19 VietNam. Impacts of global health orgs on people’s health/wellbeing in VietNam? | Additional current articles will be added for readings at this class.  
Assignments:

Global/local Artifact: VietNam
In light of your observations, as well as concepts and theories from lectures and readings, complete the Global/Local Artifact Assignment. See full instructions listed under Global/Local Artifact USA (p.5).

Critical Issue Analysis: VietNam
*This Critical Issue Analysis assignment will be recurring. Refer back to this section for directions and the grading rubric.*

By the middle of each location in program, you will be expected to understand and be able to describe a critical issue at the intersection of globalization and health, how this issue is connected between the local and the global, any structural considerations that this issue highlights, and how this issue maps to actions by both government and civil society. In order to do this assignment well, you will need to be engaged in lectures, seek out information, talk with people, and be observant to learn about the healthcare system in each context.

This assignment will contain a visual plus about 1,000 written words. There are 3 required elements of the paper:
1. Draw a visual representation of the critical issue that shows the larger global context and the local realities.
2. In about 1,000 words, you explain the issue, how this issue is connected between the local and the global, any structural considerations that this issue highlights, and how this issue maps to actions by both government and civil society.
3. Be sure to address these two aspects in your work:
   a. Why does this issue exist in this context and how did it develop into its current status?
   b. What are the future possibilities for improving this critical issue? What would need to happen globally or local for this improvement to occur?

The faculty and staff will assist you should you have questions about this assignment as you progress through the semester. These assignments, along with your module assignments listed in the rest of the syllabus, will become part of your overall portfolio of GH assignments that you will use for your Module 4 assignment at the end of the semester.

Assignments

Global/local Artifact: South Africa
In light of your observations, as well as concepts and theories from lectures and readings, complete the Global/Local Artifact Assignment. See full instructions listed under Global/Local Artifact USA (p.5).

Critical Issue Analysis: South Africa
You are expected to analyze a critical issue at the intersection of globalization and health. See full instructions listed under Critical Issue Analysis VietNam (p.8).

Major Assignment: South Africa
Your local faculty will distribute the major assignment upon arrival. The assignment will be 1,250 (min) to 1500 (max) words (4-5 typed pages). This assignment is specific to this field program, and will take the form of a paper, project, or activity analysis. Assignment details and rubric will be discussed in the first class and then paper themes will be reviewed by faculty in class well before the submission of final assignment. This assignment is worth 20 points. The rubric that follows is typical and shows the level of work expected.

Assignment: PH/GH Comparative Auto-Ethnography, Individual Self-Assessment of Learning

This assignment is shared between the PH and GH classes and is worth 10 points in each class (total of 20 points, evenly distributed between the two classes).

For this assignment you will complete three steps:

1. **Review your PH and GH work for the semester**
2. **Complete an Individual Self-Assessment Rubric**
3. **Write a narrative learning analyses to demonstrate the merit of your self-assessment**

**Helpful Hints:**

*This assignment is meant to get you reflecting and thinking—not to do new research. Just build on what you have. The only new writing you will do is your responses to the questions in Step Three. Don’t make this harder than it needs to be! Have a little fun with it!*

***NB*** All work (grading rubric, writing, and artifacts) should be submitted as ONE Word Doc or PDF file of a reasonable size. You can use an app like “PDF Compressor” to make your file size smaller, if needed.

**Step One: Review your PH and GH work for the semester**

Step One is a comparative, reflective activity, it has no written component. Compile, compare, and reflect upon the PH and GH portfolios of assignments you have built throughout the course of the semester. The idea is to review your work with an eye towards developing a more holistic sense of your learning across the two classes and the four countries—to get you thinking about your own work, analyzing your experiences, and strategizing how you will assess and demonstrate your learning in steps two and three.

Questions you may ask yourself when reviewing your work include:

1. How do the portfolios of assignments demonstrate your learning?
2. What has changed in your understanding of public health, globalization, everyday experiences of health, wellbeing, disease, or illness?
3. What interplay have you noticed between public health and globalization?
4. What connections have you been able to make between local experiences and national or global policies/trends?
5. Have you noticed that your own work took on a certain theme or interest?
6. What are you passionate about and how has that impacted your foci this semester?

**Step Two: Complete an Individual Self-Assessment Rubric**

You will assess your reflexivity and overall intellectual engagement, the ways in which you have made connections between public health and globalization, and how you have integrated class content and your experiences in all four countries into your learning process.
Copy and complete this individual self-assessment rubric. In “Step Three” you will offer a comparative analysis of your work across the semester to demonstrate the merit of your self-assessment. I will read your assignment and assess your work and grade. As long as I determine that the narrative you offer in Step Three supports the grade you give yourself on this rubric, YOU WILL RECEIVE THE GRADE YOU ASSIGN YOURSELF.

Step Three: Write a narrative learning analyses to demonstrate the merit of your self-assessment

Respond to each prompt. You may either answer them one at a time or as a single flowing narrative. Your total response to Step Three should be 1200 – 1500 words, plus artifacts or copies of assignments as required by the prompt. You must submit artifacts.

Helpful Hints:

For questions 2 and 3, choose assignments you have produced this semester and other artifacts (items, photos, or other items that you have collected along the way) and organize them so that they tell a story of your learning.

For questions 2 and 3, include a snapshot of your portfolio assignments or artifacts (or a copy/paste of your assignment/writing) so I can see the items you reference when I read your analysis. Remember: Don’t make this harder than it needs to be! Have a little fun with it!

1. Be reflective—what have you learned by comparing public health and globalization across the semester? How has your learning in the PH and GH classes contributed to a more sophisticated understanding of how public health and globalization are related? Where does this learning leave you in your personal sensibilities about the critical issues in both public health and globalization?

2. Select 2 portfolio assignments from each of your PH and GH portfolios (total of 4 assignments you completed) that demonstrate your intellectual engagement and integration of the content of these classes into a broader set of interrelated ideas. The assignments you choose should allow you to build out an analysis that incorporates comparisons between countries, as well as comparisons between the two classes and perspectives taught in each class. The goal is to demonstrate that you have developed an understanding of how public health and globalization are interrelated and mutually impactful. Include a snapshot of your portfolio assignments or a copy/paste of writing so I can see the assignments when I read your analysis.

3. Select 2 or 3 “artifacts” that are meaningful to you – these should be items that specifically relate to your journey of learning about and understanding the interplay between public health and globalization in the countries we have visited. These “artifacts” can be photographs that you have taken, pieces of personal writing, or other items you have collected along the way. These are not full portfolio entries, but could be excerpts from your classwork. Include a snapshot of your artifacts or a copy/paste of writing so I can see the artifacts when I read your analysis. Analyze the artifacts to show how they offer a narrative of reflective learning across the semester. For example, you may include three photos you took that represent how macro forces of globalization play out in everyday experiences of health… or you may include a photo of a train ticket and a bit from a journal entry to demonstrate how one particular excursion encapsulates your learning or inspired it. The goal here is to show integrated, holistic learning that draws on your classes, but also your semester experience at large.
Critical Comparative Portfolio Analysis Grading Rubric/Worksheet

Directions: Each row addresses a learning objective to be assessed in this assignment. For each row, consider the grading rubric and the qualities associated with each point value. In the last column of the rubric worksheet, give yourself the points you feel are fair and accurate for that row. Then add the values in the last column to calculate your overall score for the assignment. Note: there is a total of 20 points available.

ADD YOUR POINTS AND GIVE YOURSELF A FINAL GRADE
**Expectations and Policies**

**Class preparation**
This program is built upon the conviction that experiences result in deep insights and powerful learning. Course assignments are created to facilitate such first-hand learning opportunities. Dialogue in class about these insights and participation in these activities is critical. For this reason, your participation is required. As a learning community, each one of us influences the learning environment. Please take responsibility for your role in this environment and come to class prepared and ready to engage with others in a positive and thought-provoking manner.

**Technology in the classroom**
Electronic devices are critical tools for learning and communication, but our IHP courses prioritize engaged conversations unhindered by personal electronic devices. Students, faculty, and visitors are expected to keep cell phones, laptop computers, and other devices out of sight, sound, and mind during class sessions. There will be times when technology is needed for presentations or projects. Faculty will advise students of these times. Of course, students with accommodations are always welcome to have the technology needed.

**Participation**
IHP is an experiential learning program. You have to show up to have the experience. As such, participation is a minimum expectation, not generally to be rewarded with class credit. Students are expected to attend all classes, guest lectures, and field activities unless they have a medical excuse that has been communicated and approved of by IHP staff, or faculty. Missing one class means a small makeup assignment (as determined by the faculty); missing two classes means a sizable makeup assignment; missing three classes means a grade reduction of 2% of the total course grade. Failure to attend classes or field activities means that a student may not be eligible for credit from their universities, or could result in program dismissal.

**Materials**
All course readings will be electronically available from the first week. Hard copy of required course readings will be distributed once you arrive in each country, except in the case of the USA where the readings were sent to you as part of your pre-departure assignments. Students are responsible for downloading these materials and can print the optional readings at their own discretion. You may opt in or out of getting hard copies.

**Policy on deadlines**
Unless otherwise noted, coursework assignments are due on the day of the deadlines via Moodle (or on paper for a few assignments). Unexcused late work will result in a lower grade one full level per day (for example, a B will drop to a B-). No exceptions will be permitted; extensions are not given unless there are necessary circumstances. Exact deadlines for assignments will be confirmed by the instructor and provided to students at the start of each country program.

*Keep an additional copy of all work you turn in*, so as to avoid unexpected disaster and significant inconvenience for all parties involved; this may mean taking photos or scanning any handwritten assignments. Assignments that are not easily legible will be returned ungraded.

**Academic integrity**
Academic dishonesty is the failure to maintain academic integrity. It includes, but is not limited to, obtaining or giving unauthorized aid on an examination, having unauthorized prior knowledge of the content of an examination, doing work for another student, having work done by another person for the student, and plagiarism. Academic dishonesty can result in severe academic penalty, including failure of the course and/or dismissal from the institution/program.

Plagiarism is the presentation of another person’s ideas or product as one’s own. Examples of plagiarism are: copying verbatim and without attribution all or parts of another’s written work; using phrases, charts, figures, illustrations, computer programs, websites without citing the source; paraphrasing ideas, conclusions or research without citing the course; and using all or part of a literary plot, poem, film, musical score, computer program, websites or other artistic product without attributing the work to its creator.
Students can avoid unintentional plagiarism by carefully following accepted scholarly practices. Notes taken for papers and research projects should accurately record sources of material to cited, quoted, paraphrased or summarized, and research or critical papers should acknowledge these sources in references or by use of footnotes.

Violations of IHP/SIT Study Abroad's academic integrity policy are handled as violations of the student code of conduct, and will result in disciplinary action. Please discuss this with faculty if you have any questions.

**Violations of SIT Study Abroad academic integrity policy are handled as violations of the student code of conduct and will result in disciplinary action. Please discuss this with your Program Director or faculty if you have questions.**

**General Considerations**
- **Show up prepared.** Be on time, have your readings completed and points in mind for discussion or clarification. Complying with these elements raises the level of class discussion for everyone.
- **Have assignments completed on schedule, printed, and done accordingly to the specified requirements.** This will help ensure that your assignments are returned in a timely manner.
- **Ask questions in class. Engage the lecturer.** These are often very busy professionals who are doing us an honor by coming to speak.
- **Comply with academic integrity policies** (no plagiarism or cheating, nothing unethical).
- **Respect differences of opinion** (classmates’, lecturers, local constituents engaged with on the visits). You are not expected to agree with everything you hear, but you are expected to listen across difference and consider other perspectives with respect.

**SIT Policies and Resources**

Please refer to the SIT Study Abroad Handbook and the Policies section of the SIT website for all academic and student affairs policies. Students are accountable for complying with all published policies. Of particular relevance to this course are the policies regarding: academic integrity, research and ethics in field study and internships, late assignments, academic status, academic appeals, diversity and disability, sexual harassment and misconduct, and the student code of conduct.

Please refer to the SIT Study Abroad Handbook and SIT website for information on important resources and services provided through our central administration in Vermont, such as Library resources and research support, Disability Services, Counseling Services, Title IX information, and Equity, Diversity, and Inclusion resources.
